KNITWEAR SHOWROOM

COLLECTION AND DESIGN

Confident of our skills and comforted by our experience, we try every day to combine the needs of customers with those of each manufacturer.

We take care of the creation of the collections, starting from the choosing of the yarn, the developing of prototypes and references, **checking step by step the wearability, the fittings**, translating technical work sheets and sketches.

Our technical team makes tests of the samples and check that all the instructions requested by the customer would be applied.

We mainly work with **PRIVATE LABELS**. We offer the possibility to choose ready items or to provide us sketches to be developed. All the items can be modified and personalized as per customer's needs.

All the garments selected by our clients for their collections are **EXCLUSIVE**.

KNITTING MACHINES and TEXTILE MACHINES

We are one of the few artisanal knitwear companies that can rely on a vast machine fleet which, together with the quality of our yarns and our in-house Miele laundry, is what makes us stand out.

Such a vast machine fleet allows us to ensure **speedy deliveries** and carry out any yarn and stain removal tests to produce any detail or garment.

On one side we use „**flat machines**” of the latest generation, such as Steiger, Protti, Stoll, Shima, from 2 to 16GG.

We have also invested in a vast wholegarment **Shima Seiki** machine fleet for **seamless** garments.

On the other hand we work with „**cotton machine**” from **the 14th gauge to the 33rd gauge**, for classical articles or patterns, such as Intarsia, braids, with opening up to 36 inches and seamless garments.

The cut knitwear, such as **Punto Roma, Punto Milano, Piquet, Left, Straight, Ribs, Rice optics, Korn optics etc.**, are realized on **circular knitting machine** (mostly **Jumber- ka**).

Our **in-house laundry** allows us to monitor the fibres’ reaction to treatments. Our team of experts develops a special wash program to ensure added softness and higher quality standards.
